

AI in Business Analytics

RevMind

SMARTER DECISIONS, INSTANTLY

- RevMind is an AI-powered analytics app that helps MSMEs turn routine business data into smarter decisions instantly.

- **A Short Problem Statement-**

Many MSMEs struggle to understand their data, leading to missed opportunities and lower profits.

- **Solution Box-**

RevMind solves this by using AI to give clear, simple insights that help MSMEs grow.

- **RevMind** is a combination of two words:
- **“Revenue”** – Which stands for money, growth, and business success.
- **“Mind”** – Which stands for intelligence, smart thinking, and wise decisions.
- So, **RevMind means “A Smart mind that thinks for your business to increase your revenue.”**
- It shows how this app uses artificial intelligence to help MSMEs make better decisions, grow their business, and stay ahead like having an extra brain that works only for your profits.

VISION AND MISSION -

- **VISION-**

To make every Indian MSME future ready by unlocking the real value of their business data, so they can take smarter decisions, grow confidently, and stay strong in a changing world.

- **MISSION-**

To provide affordable, intelligent, and easy-to-use AI tools that turn everyday business data into meaningful insights, enabling MSMEs to make quick decisions, serve customers better, and increase profits without needing technical expertise.
